

WINTER 2010: WHAT WILL IT BRING?

Heating system failures, that's what!

It's here again... the season of cracked boilers, frozen pipes, burst oil tanks, chimney fires, soot damage, hot water heater floods, and an almost endless list of homeowner horrors. The good news is that ISE is geared up and ready, with our network of licensed engineers, heating system contractors, and plumbers standing by all over New England... from Northern Maine to The Cape and The Islands. ISE can quickly respond to requests for service allowing us to document, film, and photograph a loss site before evidence is damaged, lost, or altered. This is of vital importance for investigations caused by **fires, freeze ups, floods, and other catastrophes.**

Defective water heater relief valve

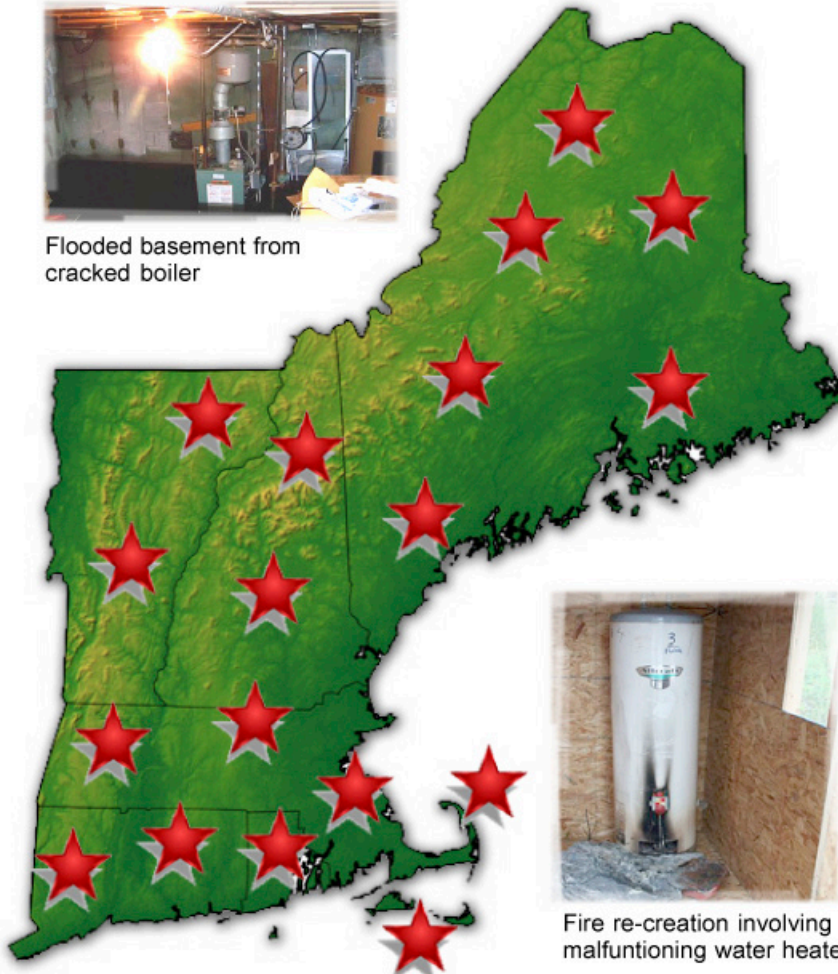

Flooded basement from cracked boiler

Frozen radiator flood

Wood burning stove chimney fire

Fire re-creation involving malfunctioning water heater

Overheated boiler and resulting fire

Burst pipe and total house loss

Soot damage to kitchen

Engineering, Inc.

The answer is in the engineering.

15 Extension Street, Attleboro, MA 02703
